

## IN THE CLAIMS

1. **(Currently Amended)** A computer-implemented method for creating a presentation, comprising ~~the steps of~~:
  - (a) receiving, by a goal based learning system, information indicative of a goal;
  - (b) integrating information that motivates accomplishment of the goal for use in the presentation;
  - (c) evaluating progress toward the goal and providing feedback that further motivates accomplishment of the goal; and
  - (d) managing the presentation of information around specific requirements designed to achieve the goal.
2. **(Currently Amended)** A The computer-implemented method for creating the a presentation as recited in claim 1, wherein the requirements include direct linkages to remedial educational presentations.
3. **(Currently Amended)** A The computer-implemented method for creating the a presentation as recited in claim 1, wherein the requirements include limits that prohibit access to sections of the a presentation until the goal is obtained.
4. **(Currently Amended)** A The computer-implemented method for creating the a presentation as recited in claim 1, including ~~the step of~~ limiting access to sections of the a presentation until appropriate prerequisites are completed.
5. **(Currently Amended)** A The computer-implemented method for creating the a presentation as recited in claim 1, including ~~the step of~~ providing feedback that identifies a navigation path for a student based on the goal.
6. **(Currently Amended)** A The computer-implemented method for creating the a presentation as recited in claim 1, including ~~the step of~~ utilizing a student identifier to control access to appropriate presentation material.

7. **(Currently Amended)** ~~A~~ The computer-implemented method for creating the a presentation as recited in claim 1, wherein each item in the presentation is assigned an identifier to provide a level of granularity for restrictive access to presentation material.

8. **(Currently Amended)** ~~A~~ The computer-implemented method for creating the a presentation as recited in claim 1, wherein each activity associated with the a presentation is identified to provide a level of granularity for restrictive access to the activity.

9. **(Currently Amended)** ~~A~~ The computer-implemented method for creating the a presentation as recited in claim 1, including ~~the step of~~ storing a current location for one or more students that tracks the one or more students progress in the presentation.

10. **(Currently Amended)** An apparatus that creates a presentation, comprising:

- (a) ~~(b)~~ a processor;
- (b) ~~(e)~~ a memory that stores information under the control of the processor;
- (c) logic that receives information indicative of a goal;
- (d) logic that integrates information that motivates accomplishment of the goal for use in the presentation;
- (e) logic that evaluates progress toward the goal and providing feedback that further motivates accomplishment of the goal; and
- (f) ~~(a)~~ logic that manages the presentation of information around specific requirements designed to achieve the goal.

11. **(Currently Amended)** ~~An~~ The apparatus that creates the a presentation as recited in claim 10, wherein the requirements include direct linkages to remedial educational presentations.

12. **(Currently Amended)** ~~An~~ The apparatus that creates the a presentation as recited in claim 10, wherein the requirements include limits that prohibit access to sections of the a presentation until the goal is obtained.

13. **(Currently Amended)** ~~An~~ The apparatus that creates the a presentation as recited in claim 10, including logic that limits access to sections of the a presentation until appropriate prerequisites are completed.

14. **(Currently Amended)** ~~An~~ The apparatus that creates the a presentation as recited in claim 10, including logic that provides feedback that identifies a navigation path for a student based on the goal.

15. **(Currently Amended)** ~~An~~ The apparatus that creates the a presentation as recited in claim 10, including logic that utilizes a student identifier to control access to appropriate presentation material.

16. **(Currently Amended)** ~~An~~ The apparatus that creates the a presentation as recited in claim 10, wherein each item in the presentation is assigned an identifier to provide a level of granularity for restrictive access to presentation material.

17. **(Currently Amended)** ~~An~~ The apparatus that creates the a presentation as recited in claim 10, wherein each activity associated with the a presentation is identified to provide a level of granularity for restrictive access to the activity.

18. **(Currently Amended)** ~~An~~ The apparatus that creates the a presentation as recited in claim 10, including logic that stores a current location for one or more students that tracks the one or more students progress in the presentation.
